Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives
