SECTION 1.0

INTRODUCTION

SECTION 1.0

INTRODUCTION

1.1 PURPOSE

Analytical Environmental Services (AES) has prepared this Environmental Site Assessment (Phase I ESA) in conformance with the Bureau of Indian Affairs (BIA) guidelines (602 DM Chapter 2) and the American Society for Testing and Materials (ASTM) Standard Practice E 1527-05, which specifies the appropriate inquiry requirement for the innocent landowner defense under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This Phase I ESA encompasses designated Broward County Assessor's Parcel Numbers (APN) 218-030-021, 218-010-451, 218-030-040, 218-010-440, 218-030-080, 218-030-030, and 218-010-452) totaling approximately 45- acres, located in the City of Coconut Creek, in Broward County, Florida (**Figure 1**). As such, the use of the term "Subject Property" refers to the entire 45-acre property unless otherwise stated. The purpose of this assessment is to identify Recognized Environmental Conditions (RECs) that may affect future uses of the Subject Property.

This Phase I ESA covers the Subject Property, adjacent areas, and surrounding known sources of contamination, up to 1.0 mile from the Subject Property. A site reconnaissance inspection of the Subject Property, a visual inspections of adjacent properties, and a review of relevant database listings of hazardous materials sites, waste generators, and underground storage tanks were reviewed (EDR, 2011). AES also reviewed historical aerial photographs and topographic maps of the Subject Property for historic review of past land uses.

1.2 RECOGNIZED ENVIRONMENTAL CONDITIONS

The term REC refers to the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Additionally, the term historical REC refers to an environmental condition associated with the

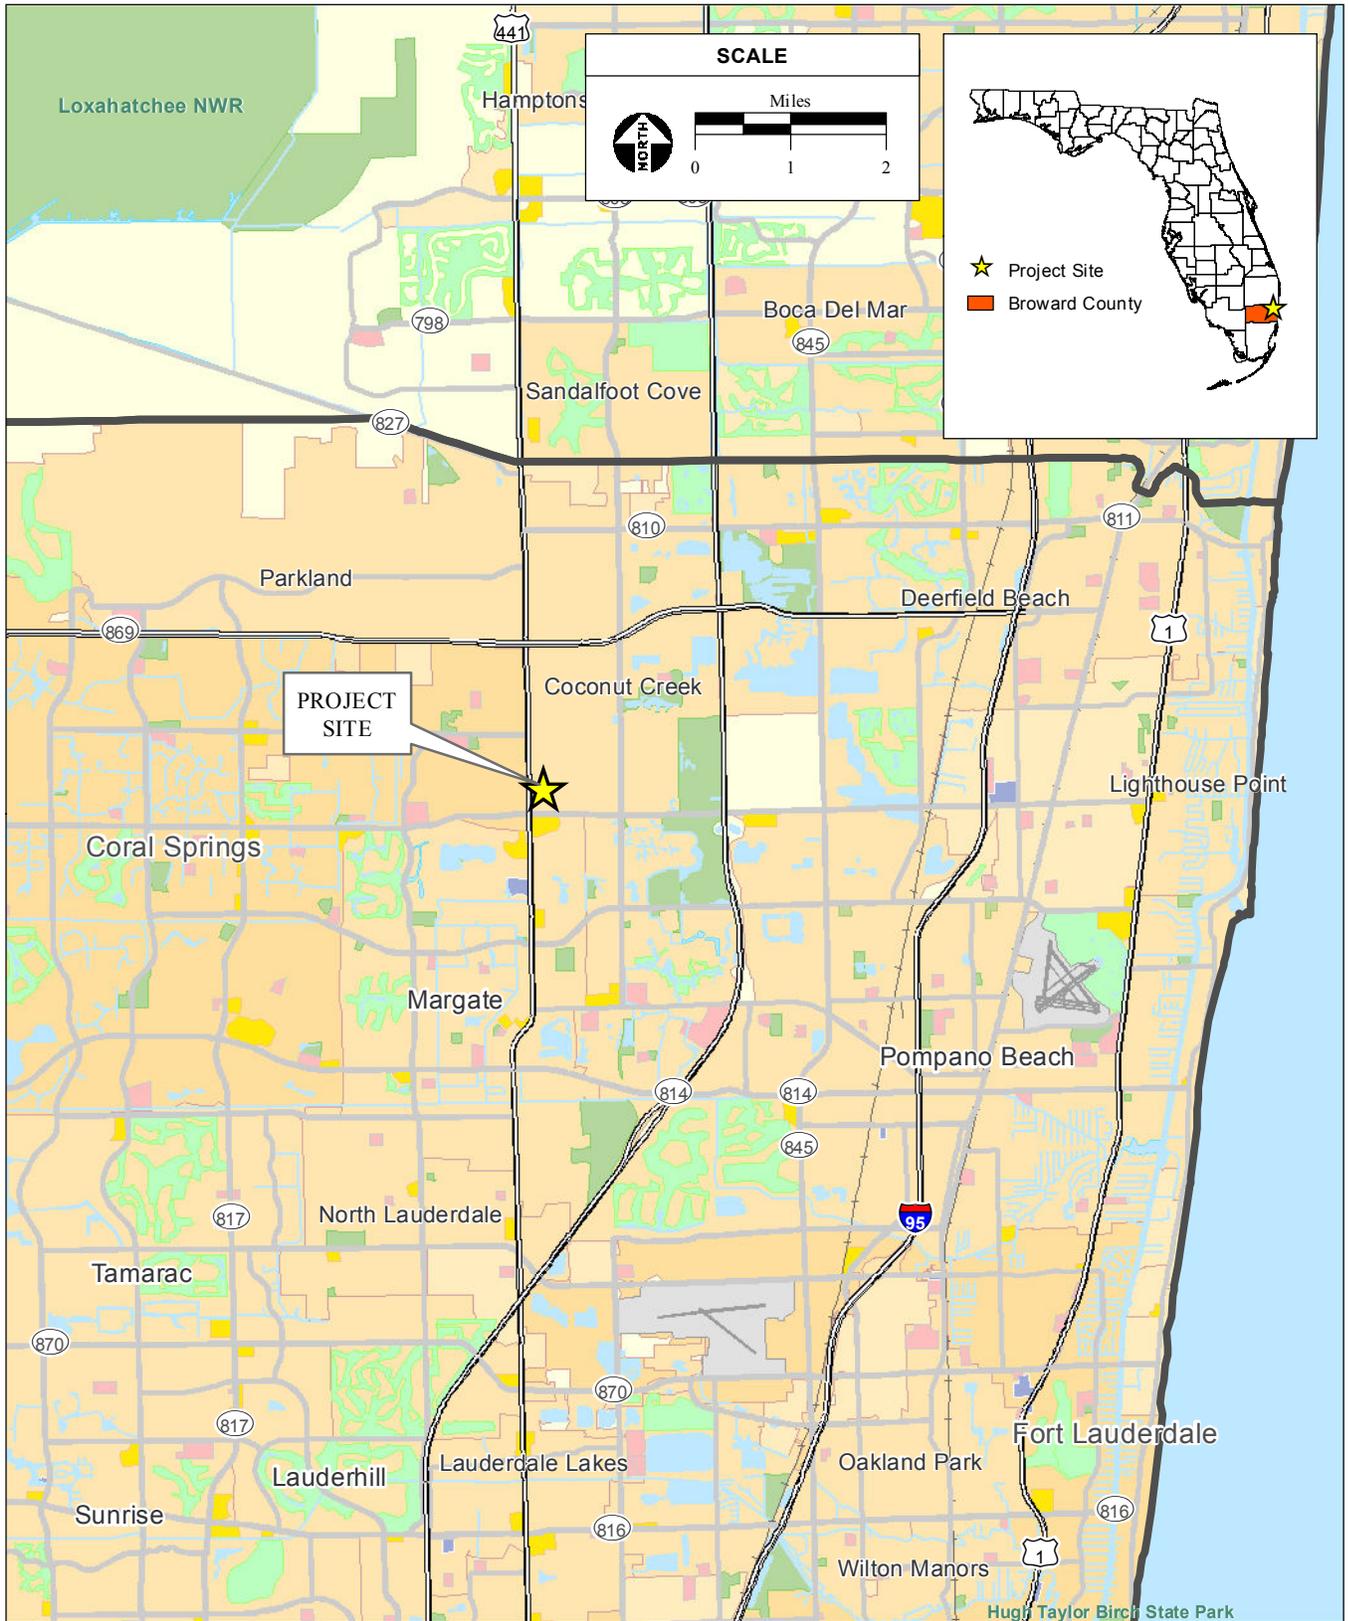

Figure 1
Regional Location

Subject Property, including a past release of any hazardous substance or petroleum product, which in the past would have been considered a REC, however such condition has since been remediated. Historical RECs will therefore be included in this Phase I ESA (ASTM, 2006).

1.3 LIMITATIONS AND EXCEPTIONS

No Phase I ESA can completely eliminate uncertainty regarding the potential for RECs in connection with a property. Conformance of this assessment with ASTM Standard Practice E 1527-05 will reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the Subject Property. While AES has made every effort to discover and interpret available historical and current information on the property within the time available, the possibility for undiscovered contamination remains. AES's report is a best-effort collection and interpretation of available information consistent with industry standards for the completion of Phase I ESAs.

This Phase I ESA is based on a site reconnaissance of the Subject Property, searches of government hazardous materials databases, and interviews with individuals familiar with the historical uses of the Subject Property. Physical testing of soil or groundwater was not within the scope of this assessment. Asbestos containing building materials (ACM) and lead-based paint surveys were not included. Information was obtained for this Phase I ESA to comply with ASTM guidelines.

1.4 METHODOLOGY

A variety of data sources were consulted in completing this Phase I ESA. The following subsections describe the methods used and the data sources consulted to accomplish each task.

1.4.1 HISTORICAL REVIEW

Previous land uses and history of the Subject Property were researched in an effort to identify RECs at or near the Subject Property. Historical aerial photographs (**Appendix A**) and topographic maps (**Appendix B**) from different decades were examined for the presence of aboveground storage tanks, industrial buildings, gas station canopies and/or pump islands, as well as other indications of bulk hazardous material storage within the study area. Sanborn Fire Insurance Maps (**Appendix C**) document historical property use through abbreviations and map symbols that identify commercial, industrial, residential and other land uses.

1.4.2 DATABASE SEARCHES

Database searches were conducted for records of known storage tank sites and known sites of hazardous materials generation, storage, or release. Available information from federal, state,

and local agency lists of: (a) known or potential hazardous waste sites and landfills; (b) sites currently under investigation for environmental violations; (c) sites which manufacture, generate, use, store, and/or dispose of hazardous materials or hazardous wastes; (d) sites which have underground storage tanks (USTs); and (e) sites with recorded violations of regulations concerning USTs and hazardous materials/hazardous wastes. The database search is intended to identify facilities that may have the potential to impact surface and subsurface conditions on the Subject Property. A full listing of sites within the vicinity of the Subject Property is provided in **Appendix D**.

1.4.3 SITE RECONNIASSANCE

David Sawyer from AES conducted a reconnaissance inspection of the Subject Property and adjacent properties on May 4, 2011. The purpose of the site reconnaissance is to examine the property for obvious physical indications of improper hazardous substance or petrochemical disposal such as stained soil or asphalt, stressed vegetation, sumps, partially buried drums, bulk underground fuel storage tanks, and other obvious signs of hazardous materials involvement. In addition, adjacent properties were visually inspected to the extent possible without trespassing on private property to determine if current land uses would affect the planned uses of Subject Property.

1.5 DEVIATIONS AND DATA GAPS

ASTM Standard 1527-05 requires any significant data gaps, deviations and deletions from the ASTM Standard to be identified and commented on in the Phase I. A significant data gap would be one that affected the ability to identify a REC on the Subject Property or adjacent properties.

Due to the rural location of the Subject Property, Sanborn Fire Insurance maps were not available for the Subject Property (**Appendix C**). Because there is no historical data or physical indications that the property has ever been developed or occupied by a business that would have produced hazardous materials, the lack of Sanborn Fire Insurance maps is not considered a significant data gap for this Phase I ESA.

1.6 CREDENTIALS

David Sawyer prepared this report under the professional supervision of David Zweig, P.E., who qualifies as an environmental professional (EP) as defined in the ASTM Standard 1527-05 [40 CFR §312.10(b)]. The signatures of David Sawyer and David Zweig appear in **Section 6.0** of this Phase I and their resumes are included as **Appendix F**.

SECTION 2.0

SITE DESCRIPTION

SECTION 2.0

SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The Subject Property is located adjacent to existing Seminole Tribe of Florida (STOF) federal trust property within the City of Coconut Creek, Broward County, Florida (**Figures 2 and 3**). The Broward County assessors' parcel numbers (APNs) for the Subject Property are 218-030-021, 218-010-451, 218-030-040, 218-010-440, 218-030-080, 218-030-030, and 218-010-452 (totaling approximately 45-acres).

2.2 SITE AND VICINITY CHARACTERISTICS

The Subject Property is comprised of a total of 45-acres of developed land. The current land use on the Subject Property is surface parking, stormwater retention ponds, and a portion of the Coconut Creek Casino structure, housing a buffet and administration offices. The Subject Property's average elevation is approximately 14 feet National Geodetic Vertical Datum (NGVD).

Regional access is provided by State Route 7 (SR-7), which runs in a general south-north direction and is located to the immediate west of the Subject Property. Local access to the Subject Property from SR-7 is provided via a direct access road near the northwest corner of the project site, by way of Sample Road to the south, and via access roads along NW 54th Avenue to the east Starr Road. Direct access to the Subject Property is additionally provided by NW 40th Avenue, which bisects the middle of the Subject Property (**Figure 3**). Title of NW 40th Avenue has recently been transferred from the City of Coconut Creek and Broward County to STOF.

2.3 LOCAL ENVIRONMENTAL RECORDS SOURCES

Local Environmental Agency

A request to the Broward County Environmental Protection Division was submitted on August 1, 2011 regarding a review of available files regarding potential hazardous material incidents at the Subject Property. As of the date of this Phase I ESA, no response has been received from Broward County Environmental Protection Division regarding the Subject Property. However, the EDR (**Appendix D**) and the Broward County Environmental Protection Division website (BCEPD, 2011) provided search and documentation of the available Broward County hazardous materials data.

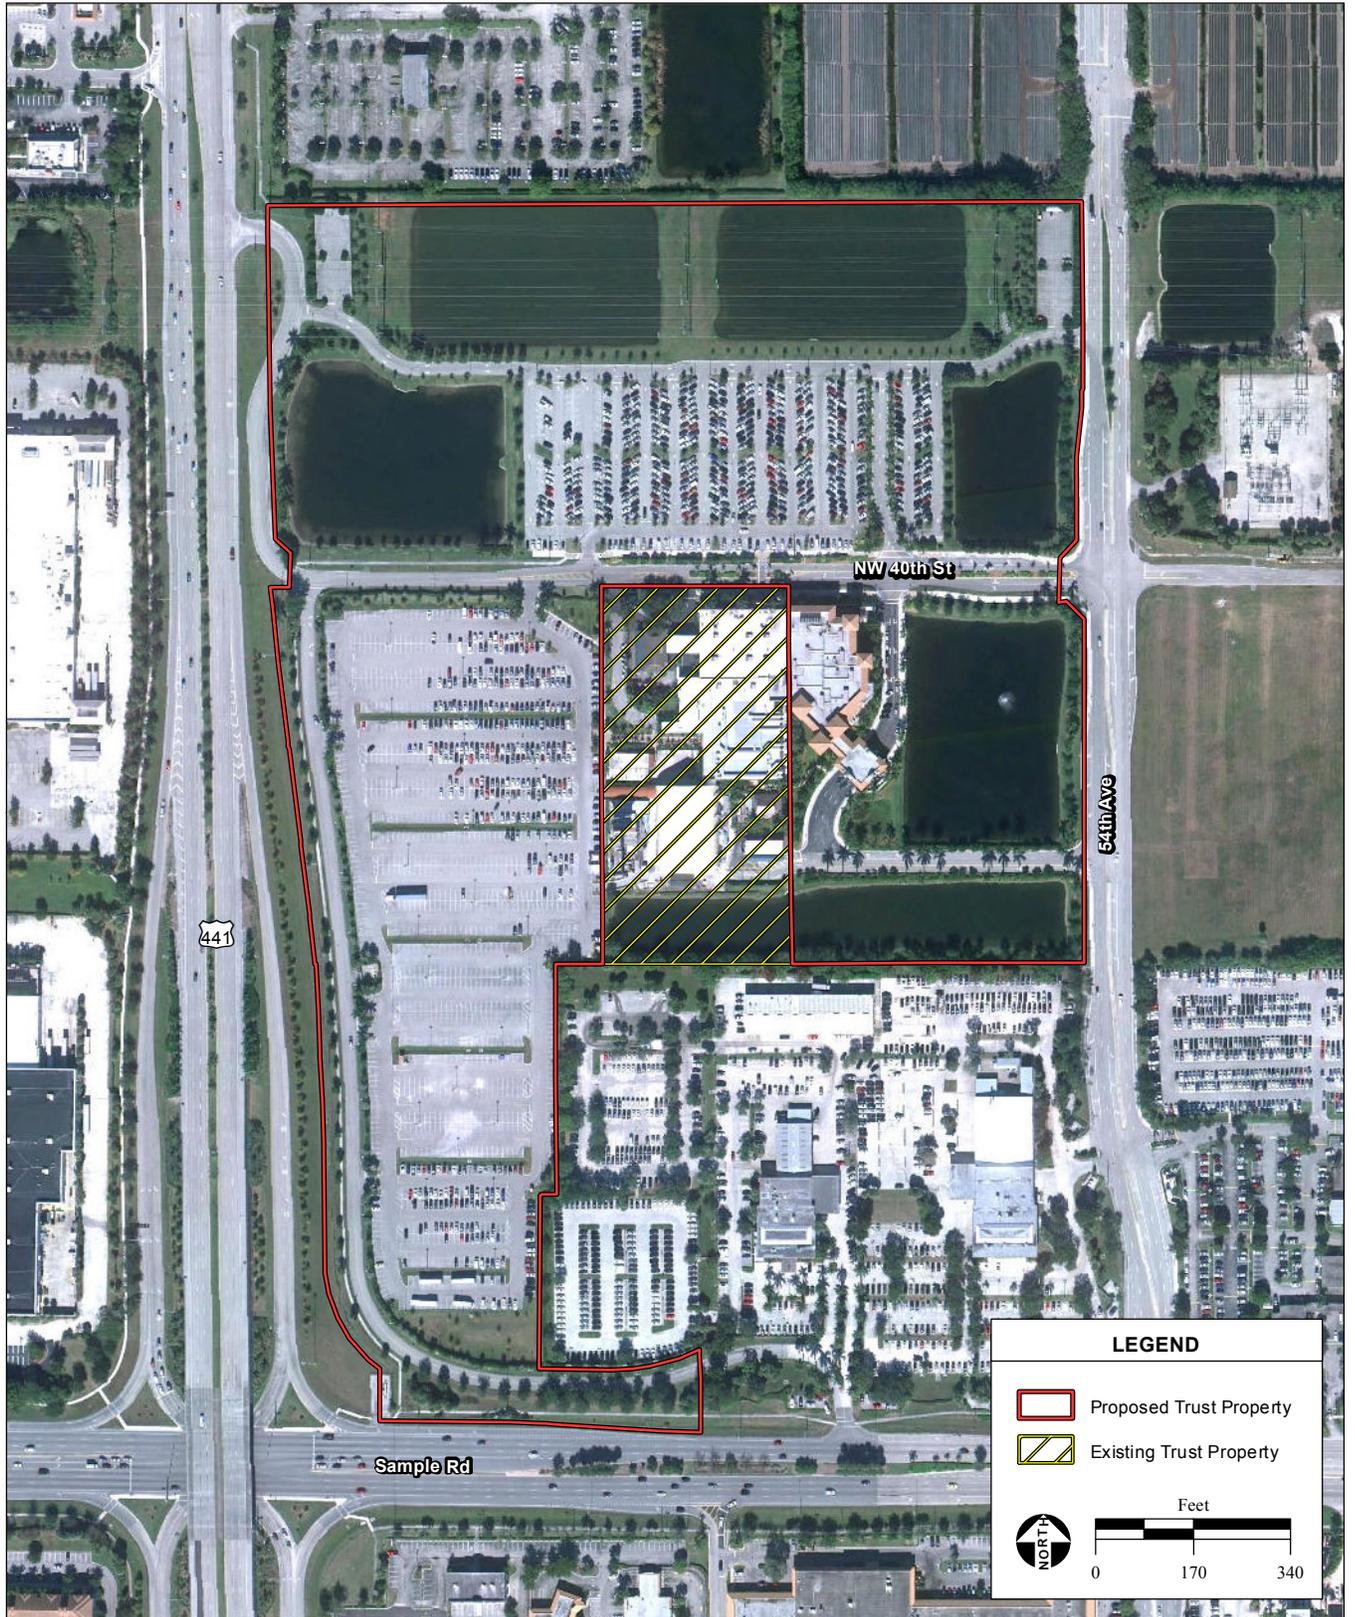

Figure 3
Aerial Photograph

Department of Planning and Zoning

Land use planning and development for Subject Property is guided by the City of Coconut Creek Zoning Ordinance, the *MainStreet Design Standards* (City of Coconut Creek, 2008) as modified by the *Seminole Planned MainStreet Development District for the Seminole Tribe of Florida* (Seminole PMDD), and *City of Coconut Creek Comprehensive Plan* (City of Coconut Creek, 2007). The Subject Property is zoned as a Planned MainStreet Development District (PMDD; City Ordinance 2011-005), which is consistent with the current location and land use.

Electrical Utility Company

Florida Power and Light (FPL) provides electrical utilities and Peoples Gas provides gas utilities to service customers in the vicinity of the Subject Property. A small portion of the Subject Property is developed with structures which utilize connections to these utility providers existing infrastructure.

Other Local Environmental Records Sources

The Florida Department of Environmental Protection website was reviewed for listings of underground storage tanks (USTs), leaking underground storage tanks (LUSTs), spill cases, and registered hazardous waste generators (DEP, 2011). The DEP website had no listing of USTs, LUSTs, and spill cases at the Subject Property. The nearest listing is the Al Hendrickson Toyota facility, approximately 700 feet east of the Subject Property in response to small quantity generator (SQG) of hazardous materials.

2.4 HYDROLOGY

Based on the United States Geological Survey (USGS) groundwater data, the depth to groundwater ranges from approximately 8 to 14 feet below ground surface (bgs) with a groundwater gradient generally towards the southwest and southeast (USGS, 2005). Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations. Prior to off-site discharge through regional canal networks, surface water on the Subject Property drains through on-site drainages to existing man-made retention basins.

2.5 GEOLOGY AND SOIL

According to information provided in the *The EDR-Radius Map with Geocheck[®]* regulatory database report (EDR database report), the rock stratigraphic unit at the Subject Property is Cenozoic, which is in the Quaternary system and series. Soils in the vicinity of the Subject Property include Immokalee fine sand at depths ranging between zero and 72 inches bgs. The hydrologic group rating for soils in this area is generally Class B/D, which indicates soils that exhibit high water infiltration rates (**Appendix D**).

2.6 CURRENT USES OF THE SUBJECT PROPERTY

David Sawyer of AES performed a site reconnaissance survey of the Subject Property on May 4, 2011. The Subject Property was developed with surface parking lots, retention basins, internal roadway networks, portable office trailers, and a portion of the Coconut Creek Casino structure. Site photos showing conditions of the Subject Property during the site visit are shown in **Figure 4** in **Section 3.0**.

2.7 HISTORIC USES OF THE SUBJECT PROPERTY

2.7.1 AERIAL PHOTOGRAPHS

Available historic aerial photographs (**Appendix A**) were reviewed for information regarding past uses of the Subject Property and surrounding areas. The following aerial photographs were available for review: 1968 (1"=500'), 1972 (1"=1000'), 1976 (1"=500'), 1981 (1"= 500'), 1984 (1"= 1000'), 1992 (1"= 750'), 1999 (1"= 604'), 2005 (1"= 604'), 2006 (1"= 604'), and 2007 (1"= 604'). Aerial photographs were of varying scale and clarity. Historical aerial images offer detailed review of previous land uses on the Subject Property and adjacent properties.

1968, 1972, 1976, 1981, and 1984

A majority of the Subject Property is undeveloped, however the presence of a small grouping of structures is located in the middle of the Subject Property. State Route 7 (SR-7) is visible to the immediate west of the Subject Property. The adjacent properties include agricultural fields, open space, and small development structures.

1992 and 1999

The Subject Property appears to be developed with the same land uses as described above. Adjacent properties to the immediate south of the Subject Property have been developed as a car dealership. Residential developments are indicated to the south across Sample Road and to the west across SR-7.

2005 and 2006

The 2005 and 2006 aerial photos indicate the development of the Seminole Coconut Creek Casino immediately adjacent to the Subject Property. Continued residential and commercial development is occurring to the north, south, and west.

2009

The 2009 aerial photograph shows the Subject Property developed in its current configuration.

2.7.2 HISTORIC TOPOGRAPHIC MAPS

Available historic USGS Topographic Quadrangles (**Appendix B**) were reviewed for information regarding past uses of the Subject Property. The *West Dixie Bend* Topographic Quadrangle maps dated 1949, 1962, 1969, and 1983 were available for review. The topographic maps depict a majority of the Subject Property as being undeveloped. Three small structures are present on the topographic maps may or may not be located on the Subject Property.

2.8 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps do not provide coverage of the Subject Property. Documentation of the lack of coverage is included in **Appendix C**.

2.9 OTHER PHYSICAL SETTING SOURCES

Wetlands Map

No wetlands are located on the Subject Property (EDR, 2011). The presence of a man-made wetland was identified in the southeastern portion of the Subject Property (AES, 2011).

Floodplain Map

The Subject Property is located in Zone X of the Flood Insurance Rate Map, the property lies in an area determined to be outside the 500-year floodplain and therefore has moderate to low flooding risk (FEMA, 1978).

SECTION 3.0

SITE RECONNAISSANCE AND INTERVIEWS

SECTION 3.0

SITE RECONNAISSANCE AND INTERVIEWS

3.1 OBJECTIVE

The objective of the site reconnaissance is to identify current or historic hazardous materials involvement on the Subject Property or in the vicinity of the Subject Property. Hazardous materials involvement or signature environmental conditions include the presence or likely presence of any hazardous materials or petroleum products that indicate an existing release, past release, or a threat of release into any structure on the property, soil, or groundwater. Signs of possible hazardous materials involvement would include any indications of underground storage tanks existing on the Subject Property, stained soils and/or unusual odors originating from the Subject Property, indications of an excavation or removal of soils, including patched asphalt and large debris piles, and other obvious signs of hazardous materials involvement.

Interviews included contacting individuals familiar with the Subject Property and adjacent properties that are knowledgeable of historic and existing conditions relative to hazardous materials.

3.2 SITE RECONNAISSANCE FINDINGS

A site reconnaissance of the Subject Property was performed by David Sawyer of Analytical Environmental Services (AES) on May 4, 2011. Adjacent properties were observed to the extent possible without trespassing. **Figure 4** provides photographs that show the site conditions at the time of the April 2011 site visit. Notable features and environmental conditions are summarized below:

- The Subject Property comprises approximately 45 acres of developed land, and contains support facilities for the adjacent Coconut Creek Casino, including surface parking lots, stormwater retention basins, internal access roadways, and a portion of the casino structure containing a buffet and administration offices. (**Photos 1 and 2**)
- Construction activities were occurring on the north portion of the Subject Property. These activities included the operation of various heavy machinery and equipment in the construction of a multi-story parking structure (**Photos 3 and 4**).
- No indications of hazardous materials releases were observed within the Subject Property.

PHOTO 1

PHOTO 2

PHOTO 3

PHOTO 4

3.3 ADJACENT PROPERTIES

A survey of adjacent properties was performed to the extent possible without trespassing during the May 4, 2011 site visit. The purpose was to identify adjacent businesses and determine if current land uses would affect the planned use of the Subject Property. Adjacent land uses are described below.

- North: Large commercial automobile sales center and undeveloped agricultural lands.
- South: Sample Road and a large commercial automobile sales center.
- West: State Route 7 (SR-7), across for which is a large commercial development.
- East: Florida Power and Light (FPL) substation and a retention pond to the northeast. A surface parking lot to the southeast.

3.4 INTERVIEWS AND QUESTIONNAIRES

A standard property owner questionnaire and user questionnaire were completed by the current property owner, on May 4, 2011. The questionnaires are included as **Appendix E**. An interview summary is provided in **Table 3-1**.

TABLE 3-1
Interview Summary

Role	Name	Title/Company	Years Assoc. With Property	Interview Type
Site Contact	Joe RedFeather McKnight	Director of Facilities – Seminole Casino Coconut Creek	4 years	Person

SECTION 4.0

RECORDS REVIEW

SECTION 4.0

RECORDS REVIEW

4.1 DATABASE SEARCH

Database searches were conducted for records of known storage tank sites and known sites of hazardous materials generation, storage, and/or contamination. Databases were searched for sites and listings up to one mile from the Subject Property. The environmental database review was accomplished by using the services of a computerized search firm *Environmental Data Resources, Inc.* (EDR). EDR uses a geographical information system to plot locations of past or previous hazardous materials involvement. AES reviewed the EDR report to determine if the Subject Property and adjacent sites are listed on regulatory agency databases. The purpose is to determine if adjacent sites will impact surface and/or subsurface conditions on the Subject Property. Included in the EDR database report was a list of “unmapped sites”. The list of unmapped sites for the properties that may be located within the search radius specified for each governmental database were reviewed. These sites do not appear to be located within the applicable search radius of the Subject Property were reviewed. The complete list of reviewed databases is provided in the EDR report, included in **Appendix D** and is summarized in **Table 4-1**. Information on past and/or current hazardous materials involvement involving adjacent properties is summarized in **Section 4.2.2**.

TABLE 4-1
Environmental Data Resources (EDR)
Summary of Agency Databases

Agency Database	Minimum Search Distance	Property Listed	Sites Listed (Distance from Subject Property)
EPA, RCRIS - for Hazardous Waste Generators (large quantity generators [LQG])	0.25 miles	No	0
EPA, RCRIS - for Hazardous Waste Generators (small quantity generators [SQG])	0.25 miles	No	1
EPA, RCRIS - for Hazardous Waste Generators (conditionally exempt small quantity generators [CESQG])	0.25 miles	No	0
FINDS - Florida Environmental Interest / Information System	0.50 miles	No	1

Agency Database	Minimum Search Distance	Property Listed	Sites Listed (Distance from Subject Property)
National Pollutant Discharge Elimination System (NPDES)	0.50 miles	No	1
EPA, Brownfields List (US BROWNFIELDS)	0.50 miles	No	1
PRIORITYCLEANERS List	0.50 mile	No	1
Broward County EDIEAR list	0.50 mile	No	2
State / Tribal Solid Waste Facility List	0.50 miles	No	1
Leaking Underground Storage Tank (LUST) List	0.50 miles	No	3

¹TP=Target Property

4.2 HAZARDOUS MATERIALS INVOLVEMENT

A regulatory agency database report was performed to identify locations of past and/or current hazardous materials involvement. Regulatory agency databases were searched for records of known storage tank sites and known sites of hazardous materials generation, storage, or contamination, or where violations pertaining to storage and/or use of hazardous materials have occurred. Databases were searched for sites and listings up to one mile from a point roughly equivalent to the center of Subject Property. Although a site may be listed within the database report, this does not mean the site is currently contaminated or will impact the environmental quality of the Subject Property. It should be noted that the database search is only as accurate as the data entered into the government agency maintained databases and the date on which those databases were last updated. Installation of underground storage tanks or hazardous material releases, if not reported to the appropriate agency, would not be listed on any of the databases searched.

4.2.1 SUBJECT PROPERTY

The Subject Property was not listed on any of the agency databases that were searched by EDR (**Appendix D**).

4.2.2 ADJACENT PROPERTIES

Six sites were identified within one mile of the Subject Property:

The Seminole Coconut Creek Casino is located immediately adjacent to the Subject Property and is listed on the FINDS and NPDES databases (**Appendix D**). These databases indicated that an active NPDES Construction Stormwater General Permit is currently in place for construction on the adjacent Seminole Coconut Creek Casino property. Due to assumed use of appropriate best

management practices (BMPs) during construction activities on the Seminole Coconut Creek Casino property, this site does not constitute a REC and is therefore not likely to pose a risk to the environmental quality of the Subject Property.

The Coconut Creek Site 1 Debris Staging Area is located 0.3 of a mile east of the Subject Property at 5250 NW 40th Street. This site has been listed due to its proposed location as a future site to dispose of disaster debris. Based on the current status, this site does not constitute a REC and is therefore not likely to pose a risk to the environmental quality of the Subject Property.

The Johnson/Davis Discharge facility at Sample Road / SR-7 NE located 0.26 of a mile southwest of the Subject Property is listed as a closed leaking underground storage tank (LUST) site. The incident is reported as a leak in 2000. Cleanup activities and documented cleanup status occurred in 2002 (**Appendix D**). Based on the cleanup activities and the closed case listing, this site is does not constitute a REC and is therefore not likely to pose a risk to the environmental quality of the Subject Property.

A identified LUST site is located 0.45 mile southeast of the project site at 5200 W. Sample Road. The Chevron #202935 site was identified as a discharge site in 1997; however, no cleanup activities were required (EDR, 2011). The Chevron site continues to operate with on-site underground storage tanks that are registered with the DEP and Broward County. Based on the current status, this site does not constitute a REC and is therefore not likely to pose a risk to the environmental quality of the Subject Property.

Dry Clean USA, is located approximately 0.276 mile southeast of the project site at 5528 W. Sample Road. This site is listed under the PRIORITY CLEANERS and Broward County EDIEAR databases as a historic dry cleaning facility. Information provided within the EDR Report state that the dry cleaning facility is no longer in operation (**Appendix D**). Based on the current status, this site does not constitute a REC and is therefore not likely to pose a risk to the environmental quality of the Subject Property.

Hess #09513, located 0.325 mile northwest of the project site at 4150 SR-7, is listed by the Florida Department of Environmental Protection (DEP) as an open LUST site (**Appendix D**). Based on the completed remediation activities, this site does not constitute a REC and is therefore not likely to pose a risk to the environmental quality of the Subject Property.

SECTION 5.0

FINDINGS AND CONCLUSIONS

SECTION 5.0

FINDINGS AND CONCLUSIONS

This Phase I ESA was performed in conformance with the scope and limitations of ASTM Standard Practice E1527-05 and BIA guidelines (602 DM Chapter 2). Based on information gathered while conducting this Phase I ESA, the following environmental conditions were observed:

- The 45-acre Subject Property is comprised of developed land, including surface parking lots and retention ponds. The Subject Property has historically been used as open space and undeveloped land. The available historic aerial photographs and topographic maps from EDR indicate that the Subject Property has only recently been developed with surface parking lots, retention basins, and a portion of the Seminole Coconut Creek Casino.
- No hazardous materials or evidence of past hazardous material releases were observed on the Subject Property.

This Phase I ESA was prepared in conformance with the scope and limitations of ASTM Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in **Section 1.0** of this report. This assessment has revealed no evidence of RECs in connection with the Subject Property. Based on the findings and conclusions of this Phase I ESA, the listed environmental conditions above do not warrant further study.

SECTION 6.0

REPORT AUTHORS/REFERENCES

SECTION 6.0

REPORT AUTHORS AND REFERENCES

The undersigned declare to the best of their professional opinion that they meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. David Sawyer, Site Assessor, prepared this report under the professional supervision of David Zweig, Professional Engineer, who qualifies as an environmental professional (EP) as defined in the ASTM Standard E1527-05, and has the specific qualifications based on education, training, and experience to assess a property of the nature, and setting of the Subject Property. The signatures of David Sawyer and David Zweig appear below, and their resumes are included as **Appendix F**.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Analytical Environmental Serv. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, and dated 04/25/2011 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
COCONUT CREEK SITE 1 DEBRIS ST	5250 NW 40TH STREET	E 1/4 - 1/2 (0.296 mi.)	6	12

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report.

A review of the LUST list, as provided by EDR, and dated 05/03/2011 has revealed that there are 3 LUST sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 04/13/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 04/13/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/25/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 06/14/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/12/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 04/15/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 07/25/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2011

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2011
Date Data Arrived at EDR: 04/05/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2011

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 06/13/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695

Number of Days to Update: 81	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/05/2011	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 04/05/2011	Telephone: 202-267-2180
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/05/2011
Number of Days to Update: 70	Next Scheduled EDR Contact: 10/17/2011
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Florida's State-Funded Action Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/04/2011	Source: Department of Environmental Protection
Date Data Arrived at EDR: 06/01/2011	Telephone: 850-488-0190
Date Made Active in Reports: 06/24/2011	Last EDR Contact: 06/01/2011
Number of Days to Update: 23	Next Scheduled EDR Contact: 09/12/2011
	Data Release Frequency: Semi-Annually

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

State and tribal Brownfields sites

BROWNFIELDS: Brownfield Areas

Brownfields are abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. Florida's Brownfields Redevelopment Act primary goals are to reduce health and environmental hazards on existing commercial and industrial sites that are abandoned or underused due to these hazards and create financial and regulatory incentives to encourage voluntary cleanup and redevelopment of sites.

Date of Government Version: 04/11/2011

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Marine Facilities Operating Permit

What is this permit used for? Miami-Dade County Ordinance 89-104 and Section 24-18 of the Code of Miami-Dade County require the following types of marine facilities to obtain annual operating permits from DERM: All recreational boat docking facilities with ten (10) or more boat slips, moorings, davit spaces, and vessel tie-up spaces. All boat storage facilities contiguous to tidal waters in Miami-Dade County with ten (10) or more dry storage spaces including boatyards and boat manufacturing facilities.

Miami River Enforcement

The Miami River Enforcement database files were created for facilities and in some instances vessels that were inspected by a workgroup within the Department that was identified as the Miami River Enforcement Group. The files do not all necessarily reflect enforcement cases and some were created for locations that were permitted by other Sections within the Department.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Department of Children & Families

Source: Provider Information
Telephone: 850-488-4900

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Environmental Protection
Telephone: 850-245-8238

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

STOF- COCONUT CREEK
5550 NORTHWEST 40TH STREET
POMPANO BEACH, FL 33073

TARGET PROPERTY COORDINATES

Latitude (North):	26.27790 - 26° 16' 40.4"
Longitude (West):	80.1996 - 80° 11' 58.6"
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	579915.8
UTM Y (Meters):	2906543.2
Elevation:	13 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	26080-C2 WEST DIXIE BEND, FL
Most Recent Revision:	1983

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

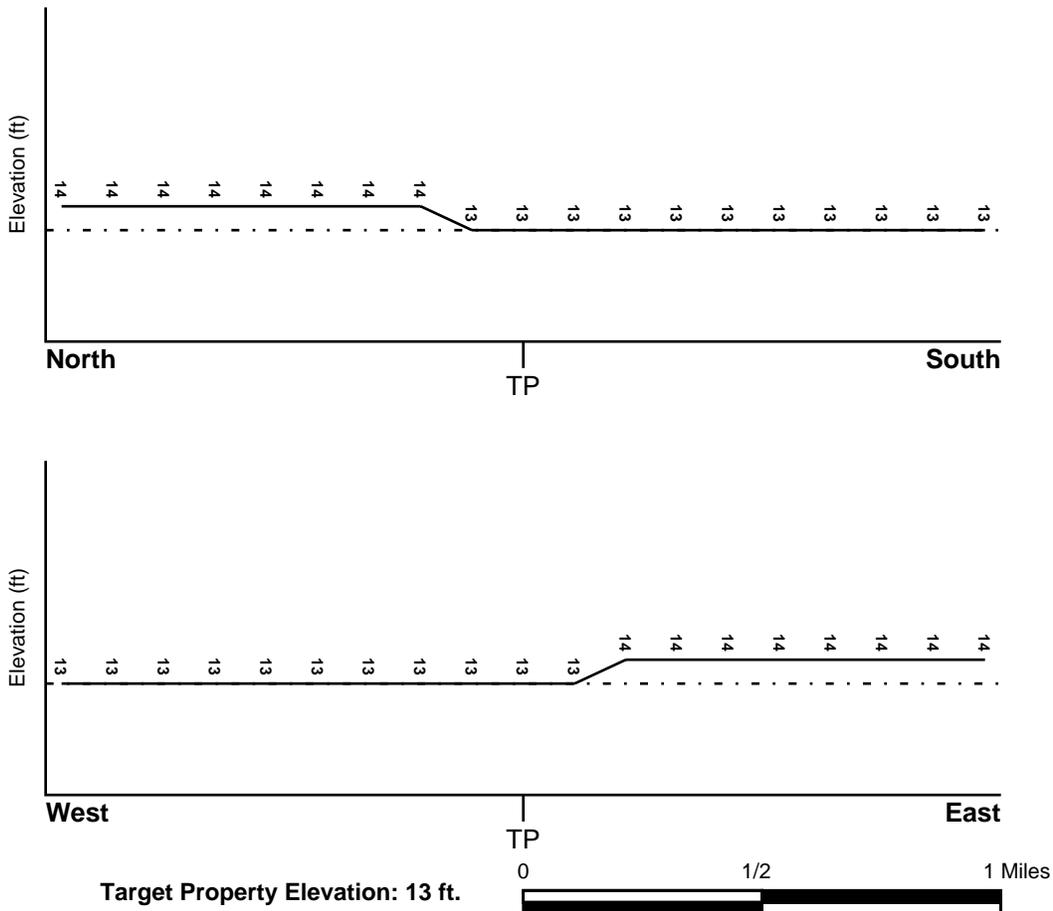

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> BROWARD, FL	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	12011C0115F - FEMA Q3 Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> WEST DIXIE BEND	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
16	1/4 - 1/2 Mile SSW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Immokalee

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
2	5 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
3	35 inches	53 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
4	53 inches	72 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Basinger

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

PROPERTY OWNER AND USER QUESTIONNAIRES

**Analytical
Environmental
Services**

August 3, 2011

**RE: Phase I Environmental Site Assessment for the 45-acre Seminole Fee-to-Trust
Project (STOF Fee Owned Property Surrounding the Seminole Coconut Creek
Casino)**

Please complete the questionnaire below with regard to the indicated property. You are being asked to provide this information and insight to assist in the preparation of an environmental site assessment for this property. Please provide as much information as you can to assist in this effort and feel free to attach extra sheets/reports if the space provided is insufficient.

Please fax/sent the completed form to:

Analytical Environmental Services
Attn: David Sawyer
1801 7th Street, Suite 100
Sacramento, CA 95814

Telephone (916) 447-3479
Fax (916) 447-1665

Thank you for your help and cooperation.

ENVIRONMENTAL QUESTIONNAIRE

Property Address: Seminole Fee-to-Trust Project

Assessor's Parcel Number: _____

Question	Answer	Responses to "Yes" Questions
1. Is the property or any adjoining property currently used for industrial purposes?	Property: <input checked="" type="radio"/> NO UNK YES Adjoining: <input checked="" type="radio"/> NO UNK YES	
2. To the best of your knowledge, has the property or any adjoining property been used for industrial purposes in the past?	Property: <input checked="" type="radio"/> NO UNK YES Adjoining: <input checked="" type="radio"/> NO UNK YES	
3. Is the property or any adjoining property used as a <u>gasoline station, motor repair facility</u> , commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Property: <input checked="" type="radio"/> NO UNK YES Adjoining: NO UNK <input checked="" type="radio"/> YES	Gas Station outside Commerce Park, Motor Repair Facilities (Car Dealers) inside Commerce Park.
4. To the best of your knowledge, has the property or any adjoining property been used as a <u>gasoline station, motor repair facility</u> , commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Property: <input checked="" type="radio"/> NO UNK YES Adjoining: NO UNK <input checked="" type="radio"/> YES	Gas Station outside Commerce Park, Motor Repair Facilities (Car Dealers) inside Commerce Park.
5. Has fill dirt been brought onto the property that originated from a contaminated site or that is of an unknown origin?	<input checked="" type="radio"/> NO UNK YES	

ENVIRONMENTAL QUESTIONNAIRE

<p>6. Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than five gallons (19 liters) in the aggregate, stored on or used at the property or at the facility?</p>	<p>New?: NO UNK <input checked="" type="radio"/> YES Past?: <input checked="" type="radio"/> NO UNK YES</p>	<p>No to Batteries and Pesticides. Other chemicals or oils yes.</p>
<p>7. Are there currently, or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallon [208 liters]) or sacks of chemicals located on the property or at the facility?</p>	<p>New?: <input checked="" type="radio"/> NO UNK YES Past?: <input checked="" type="radio"/> NO UNK YES</p>	
<p>8. Are there currently, or to the best of your knowledge have there been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?</p>	<p>New?: <input checked="" type="radio"/> NO UNK YES Past?: <input checked="" type="radio"/> NO UNK YES</p>	
<p>9. Is there currently, or to the best of your knowledge has there been previously, any areas of stained soil on the property?</p>	<p>New?: <input checked="" type="radio"/> NO UNK YES Past?: <input checked="" type="radio"/> NO UNK YES</p>	
<p>10. Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located on the property?</p>	<p>New?: <input checked="" type="radio"/> NO UNK YES Past?: <input checked="" type="radio"/> NO UNK YES</p>	

ENVIRONMENTAL QUESTIONNAIRE

<p>11. Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?</p>	<p>New?: <input checked="" type="radio"/> NO UNK YES Past?: NO UNK <input checked="" type="radio"/> YES</p>	<p>Shallow groundwater level monitoring wells have been removed.</p>
<p>12. Are there currently, or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?</p>	<p>New?: <input checked="" type="radio"/> NO UNK YES Past?: <input checked="" type="radio"/> NO UNK YES</p>	
<p>13. If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environment/health agency?</p>	<p><input checked="" type="radio"/> NO UNK YES</p>	
<p>14. Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?</p>	<p><input checked="" type="radio"/> NO UNK YES</p>	

ENVIRONMENTAL QUESTIONNAIRE

<p>15. Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property or any facility located on the property?</p>	<p><input checked="" type="radio"/> NO <input type="radio"/> UNK <input type="radio"/> YES</p>	
<p>16. Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?</p>	<p><input checked="" type="radio"/> NO <input type="radio"/> UNK <input type="radio"/> YES</p>	
<p>17. Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?</p>	<p><input checked="" type="radio"/> NO <input type="radio"/> UNK <input type="radio"/> YES</p>	
<p>18. Does the property discharge waste water on or adjacent to the property other than storm water into a sanitary sewer system?</p>	<p><input checked="" type="radio"/> NO <input type="radio"/> UNK <input type="radio"/> YES</p>	

ENVIRONMENTAL QUESTIONNAIRE

<p>19. To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried, and/or burned on the property?</p>	<input checked="" type="radio"/> NO <input type="radio"/> UNK <input type="radio"/> YES	
<p>20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?</p>	<input checked="" type="radio"/> NO <input type="radio"/> UNK <input type="radio"/> YES	

21. How do you currently use the property and how have you used the property in the past (please be specific).

Casino, Restaurants, Lounge, Smokeshop, other Retail Sales, Current.

Vacant Land, Past.

22. What is your understanding of how the property was used before your ownership/occupancy?

Vacant Land

ENVIRONMENTAL QUESTIONNAIRE

I hereby certify that to the best of my knowledge all of the information provided in this environmental questionnaire is true and correct.

APPENDIX F

RESUME

DAVID ZWEIG, PE, PRINCIPAL-IN-CHARGE

Mr. Zweig is the President of AES. Mr. Zweig has over 20 years of experience in public and private sector work focusing on environmental analysis and technical review, project management/coordination, project permitting and regulatory compliance, project feasibility and site selection. Mr. Zweig is familiar with the regulatory issues faced by public agencies and private landowners, and is adept at facilitating compliance with complex environmental laws. Mr. Zweig is a Registered Professional Engineer (#C048031).

Education

University of California, Berkeley
B.S., Civil Engineering

DAVID SAWYER, CESSWI, ANALYST II

Mr. Sawyer is an environmental specialist experienced in the preparation of CEQA and NEPA compliance documents for a variety of local, state, and federal agencies, as well as an array of private clients. Areas of expertise include compiling public and agency input, the drafting and analysis of project alternatives, and conducting land use and growth inducing impact analysis. Mr. Sawyer currently serves as an environmental analyst on various CEQA/NEPA documents for a variety of local, state, and federal agencies. Mr. Sawyer also has experience in writing storm water pollution prevention plans (SWPPPs), Phase I Environmental Site Assessments (ESA), and conducting groundwater and surface water monitoring.
