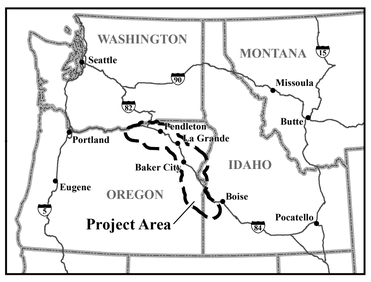
MV-9

# Greater Sage-Grouse

## BOARDMAN TO HEMINGWAY TRANSMISSION LINE PROJECT



### Resource Inventory

GREATER SAGE-GROUSE HABITAT[1]

- Priority Habitat Management Areas
- Important Habitat Management Areas (ID)
- Oregon Priority Areas of Conservation (PAC)
- General Habitat Management Areas

### Residual Impact Levels

- High
- Moderate
- Low
- No Identifiable

### Project Features

- Project Area Boundary
- Longhorn Substation (Planned)
- Hemingway Substation (Existing)
- Link
- Link Number
- Link Node
- Segment Line
- Flagstaff 230-kV Rebuild (Insets C and D)
- Double-circuit 138/69-kV Rebuild (Inset E)

### General Reference

- City or Town
- 500-kV Transmission Line
- 345-kV Transmission Line
- 230-kV Transmission Line
- 138-kV Transmission Line
- 69- to 115-kV Transmission Line
- Pipeline
- Railroad
- Interstate Highway
- U.S. Highway
- State Highway
- Lake or Reservoir
- River or Stream
- State Boundary
- County Boundary
- Jurisdictional Boundary
- Oregon National Historic Trail Congressionally Designated Alignment

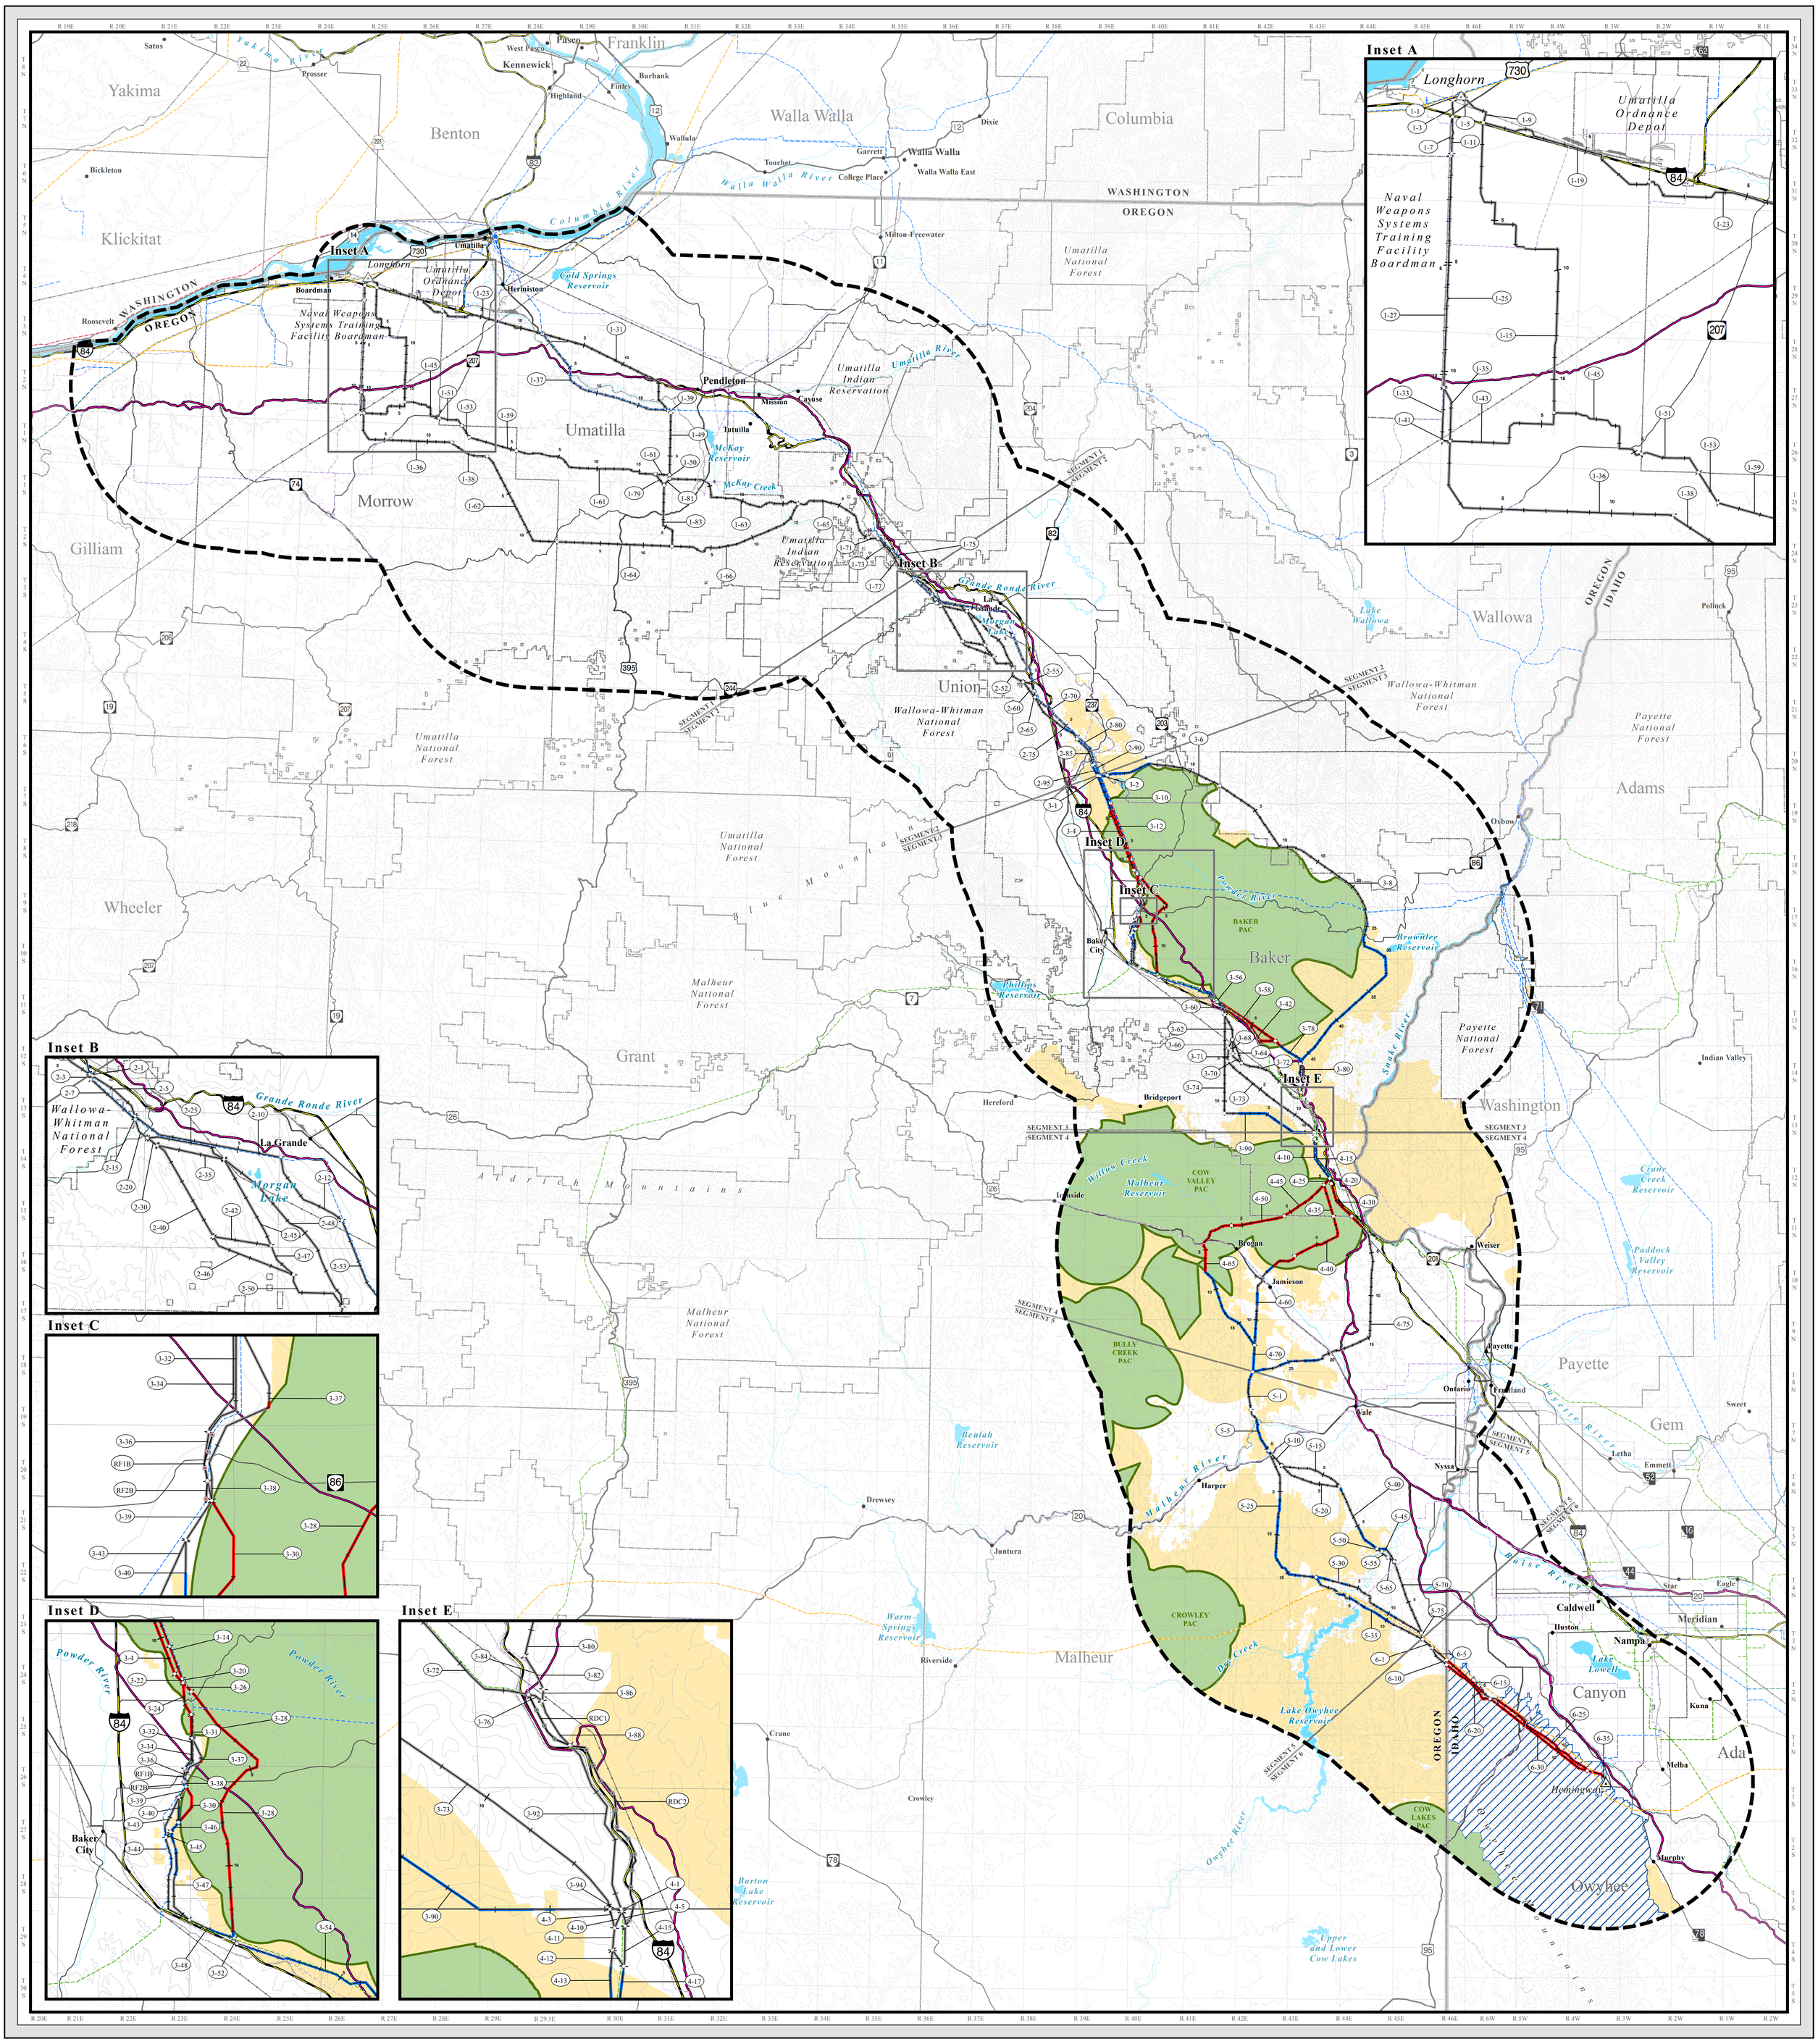
### Notes:

[1]Greater Sage-Grouse habitats are shown only within the Project area boundary.

- The alternative routes shown on this map are draft and may be revised or refined throughout the development of the Project.
- Substation symbols do not necessarily represent precise locations.
- The B2H Project area boundary is defined by buffering the alternative route centerlines.
- Contour interval: 150 meters
- Each alternative route is composed of links, which are discrete sections of the route sharing common endpoints determined by the point of intersection with other adjacent links; the common endpoint is referred to as a link node. Links generally are numbered from north to south. Similarly, a segment is composed of alternative routes that share common endpoints determined by the point of intersection with other adjacent alternative routes; the common endpoint is referred to as a segment node.
- No warranty is made by the Bureau of Land Management as to the accuracy, reliability, or completeness of these data for individual or aggregate use with other data. Original data were compiled from various sources and may be updated without notification.

FINAL EIS
November 2016


Scale in Miles
0 3 6 12 18 Miles
1:380,160 or 1 inch = 6 miles
