Attention: EPA

June 19, 2014

To Whom it May Concern:

I am writing this letter as a concerned citizen of the Connecticut Shoreline. I have lived along coastal CT for 12 years where I have enjoyed many days and evenings with friends and family at our local beach on the Long Island Sound. To know that harmful dredged materials are being dumped in the very waters that my children and their friends play in, is incredibly upsetting. There are other ways of disposing of this material that is much safer to the environment. An agreement was made in 2005 to phase out this dumping. We are now in June of 2014 and, not only does this dumping continue, but plans have been proposed to open additional sites in the area. PLEASE DO NOT USE THE SOUND AS A LANDFILL! Please honor your 2005 agreement and phase out this dangerous and unhealthy process. Sincerely,
Kelly Phillips

I oppose to the dumping
dredged material in LI Sound.

T. Donaher
176 Fairfield Pl
Hid, Ct 06824

June 23, 2016

To The EPA,

It was with shock and anger that I learned of the potential extension of legal dumping into the Long Island Sound. I thought that common sense had finally gotten an upper hand in how we treat our environment.

The restore the LI Shore effort has made considerable inroads into the healthy growth of the biodiversity of the sound. Adding more pollutants will undermine years of remediation and jeopardize not only the Sound but also coastal waterways.

There are many examples in our history to warn us that this is much too dangerous to even consider. I remember the Love Canal nightmare and do not want anything even slightly similar to affect the Sound.

Please drop the plan to open a new dump site and extend the life of the existing sites.

Sincerely,

Marie Geyer

Boston, CT 02109

June 23, 2016

Dear. U.S. EPA,

We lived in Southport near the shore of the Long Island sound and the Mill River basin which runs into the sound at 175 Sasco Hill Road. The Mill River basin is now going through environmental cleaning because it was deemed contaminated by the Exide Battery Factory. My daughter was diagnosed in January 2011 at the age of 8 years old with Burkitt's Non-Hodgkins Lymphoma after we lived near this site for a while. It has only started Cleanup recently. She was diagnosed with cancer before cleanup began. I have often wondered if the close proximity, living only a couple hundred yards away from the former Exide Battery Factory and it's contaminated soil and river beds near us had triggered her cancer. I believe it may be a possibility it was a cause.

Please do your best to protect U.S. citizens from the devastating effects of living nearby dredged, potentially toxic, materials.

I oppose dumping dredged material in LI Sound! Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

Sincerely,

Marisa Ringel
(203) 543-7193

June 23, 2016

United States E.P.A

It has been brought to my attention that the Environmental Protection Agency has the opportunity to help protect the Long Island Sound from unnecessary dumping of potentially damaging materials, threatening the local ecosystems and communities along the Sound. The lifespan extension of the Cornfield Shoals and New London Disposal Sites, stands in stark contrast to the great work that has been done by local communities to revive the Long Island Sound, making it a great place for recreation, and a healthy marine ecosystem.

I walk my two dogs every day along the Sound and the waterways the lead into it, in Fairfield, CT; and have noticed rubbish and chemical runoff that eventually makes it was into the Sound. The thought of dumping additional harmful material into the Sound itself worries me that my goal of leaving this region as a cleaner, and healthier place than I found it, will not be possible.

Please consider opposing the lifeline extensions of these harmful dumping agreements, and help not only maintain the Sound's current level of biodiversity, and recreational opportunity, but help to expand them, so that future generations won't have to write letters to their local politicians urging them to take action.

Kind Regards,

Daniel Terry

Inre Docket EPA-R01-OW-2016-0239

Dear sirs or madams,

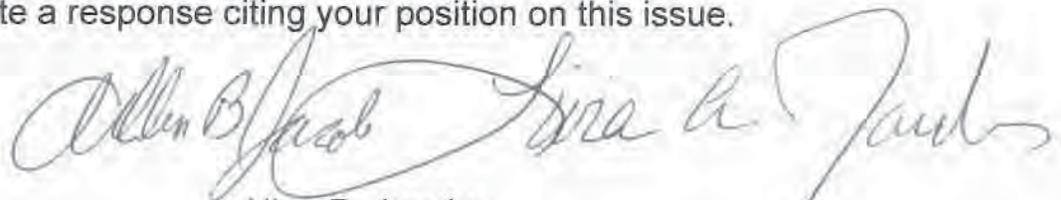

We vehemently oppose any dumping of dredged material in Long Island Sound.

We both grew up in Guilford at a time when the Sound was still relatively clean. We can both remember swimming often in clean waters at the beach. My father and I fished often and I can still visualize the day when we motored along with a school of porpoise. They rarely can be seen today. I also worked on a lobster boat in the 60's when lobsters were still plentiful in abundance in the sound. They are in abundance no longer.. Commercial fishing used to be a mainstay in the Sound and a vibrant part of our economy. Today it is a far cry from those days of plenty.

Over the years such actions as open dumping of dredged material as well as garbage has reduced the Sound to a sewer. Why? Because it is cheaper for the contractors to do so. Meanwhile, it has a dramatic effect on the people who live along the shore or enjoy the waters of.

We vehemently oppose the extension of the CSDS and NLDS and the establishment of any further sites in the Sound. Tell the contractors to find alternative methods of disposal.

We would appreciate a response citing your position on this issue.

Boston, MA 02109

June 24, 2016

To Whom it may concern

I humbly request that we stop the open water dredging in Long Island Sound immediately. Open water dumping increases nitrogen loading and correlates with elevated levels of toxins found in aquatic life. Water is a precious resource and we need to protect it while reducing levels of toxins in any way possible. My family and I enjoy visiting our waterfront and swimming in the Sound is a favorite past time... but I will now think twice about this.

I oppose dumping dredged material in Long Island Sound, Please reject the extension of CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

June 29th 2016

Dear US EPA,

Re: Docket EPA-R01-ow-2016-0239

I am writing as to express my concern over the EPA proposal to extend the use of dredged material dump sites in Long Island Sound as well as the creation of new sites. The current sites were intended to be phased out by this year according to a 2005 agreement and the US Army Corps of Engineers "Dredged Material Management Plan." I urge you to oppose EPA's plan to continue dumping dredged material in Long Island sound. I am a father of two small children and my kids frequently swim in Long Island sound. Please keep the sound safe for people who swim in it and for the animals that live in it.

Sincerely,

A handwritten signature in black ink, appearing to read "Adam Shops", written in a cursive style.

5 Post Office Square,

Boston, MA 02109

1 July 2016

To the US EPA or to whom it may concern,

As you know, there has been the dumping of waste into Long Island Sound for an extended period of time and it has caused a great deal of environ destruction. The federal government has already proposed legislation to improve the environment, and it would be in the best interest of your constituents to honor the 2005 Agreement and Phase Out Dredge Dumping in Long Island Sound disregard the plan to open a dumping site at Atlantic Bay. Not only would it profoundly improve the air and water quality, but it would return tourism to the state and stimulate economic growth. It would be beneficial to all if a proposal was made in order to protect the lives of residents in Connecticut and wildlife. On a personal note, I have spent all my summers in LI Sound and can remember as a small child, swimming with my grandfather at Windmere Beach in Milford and raw sewage floating past us, prompting an end to our frolic. They eliminated the sewer pipes and this became more of a rare occurrence instead of a daily one. My children have spent their summers in Westbrook because of that memory. I left my great-grandpa home and moved further up the coast. Please consider all stated above as destruction comes in many forms.

Sincerely

Kathleen McCreight

Long Island sound is a unique body of water, which is a huge part of our history and identity as CT. residents. I am sure it was deemed sacred to our ancestors and it should be to all of us as well. The sound provides abundant sources of food, trade, tourism and pleasure to our citizens and guests. We are blessed and privileged to be among the limited, fortunate, people on the planet that actually have a shoreline!

Please reject the extension of the CSDS and NCDS and a Neantic Bay Disposal Site. Please protect this precious gift for us, our country + world! I oppose any dredged or foreign material dumped into our sound. Please oppose plans to open any new sites and extending any existing dump sites. I am sure in our forward thinking, green world there are many ways to reuse & repurpose dredged materials.

Sincerely, lifelong Shoreline residents

July 6, 2016

Dear EPA, US Senators and US House of Representatives:

I'm writing because I'm very concerned about the dumping of dredged material in LI Sound. Adding another disposal site in Niantic Bay and extending the life of two existing sites is harming our environment. First of all, I'm concerned about the aquatic life that can be harmed. Lobster and shellfish populations have been effected. It's a sensitive ecosystem that is vulnerable to toxins in the water. We've spent millions of tax payer dollars restoring and maintaining a clean sound and it's counterproductive to be dumping waste back into it especially when we could be recycling the sediment and waste. I hope consider rejecting the plan proposed to the EPA to keep our sound clean.

Sincerely,

Nancy Follis (Wilms)

Dear U.S. EPA:

Our family is writing to you today in opposition of dumping dredged materials in the Long Island Sound and encourages you to reject the extension of the CSDS and NLDS in favor of the establishment of a Niantic Bay Disposal Site.

As lifelong Connecticut residents, it is important to our family to maintain the highest environmental quality in Connecticut. The Long Island Sound not only serves as a recreational destination but also serves as an estuary for a variety of wildlife as well as a provider of shellfish for local community dining including our family's.

Please help us protect the sound for the present and future generations.

Sincerely,

The Corcoran Family

To Whom It May Concern,

I write to you today as a concerned citizen of New Haven County. I was fortunate to have grown up in Hamden and spent a great deal of time enjoying the activities of The Sound with family and friends as a youngster. I started taking my own children to share with them and create new memories of the beaches and surrounding areas. Initially the area was as I remembered, however, that slowly changed. It was disappointing to see and realize the area beaches were no longer our favorite spots due to contaminants, sewage, etc. We started taking longer trips out of the area - Rhode Island, Cape Cod - to spend time at the shore. Our local beaches were not an option.

When I became aware of the DMMP approved by the USEPA to continue using Long Island Sound as a dumping ground for dredged material, I felt compelled to write to you, imploring you to show support and good judgment in rejecting the extension of the CSOS and NLDS in establishing a Niantic Bay Disposal Site and support the beneficial reuse of dredged materials as an alternative. Please don't let the ongoing efforts to clean the Sound be in vain. I would one day like to enjoy the shores and waters of the Sound again with my future grandchildren.

Thank you for your consideration.
Sincerely,
Mary E. Donovan

5 Post Office Square
Boston MA 02109

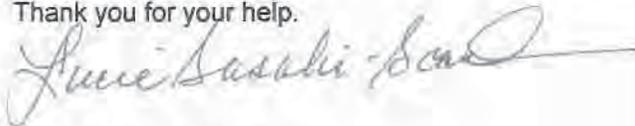

To Whom It May Concern –

It has come to my attention that the EPA is planning to dump as much as 50 million cubic yards of dredged material into Long Island Sound over the next 30 years. This despite an agreement back in 2005 that such dumping would be phased out in the short term.

Especially disturbing is their plan to add a new dump site off the coast of Niantic. It's bad enough that they plan to continue to use the two sites already in existence. Creating a new site adds salt to the wound.

I encourage you to use your best efforts to head off this ill-conceived plan by the EPA.

Thank you for your help.

EPA New England Office
OEP 6-1
5 Post Office Square
Boston MA 02109

To Whom It May Concern –

I was very disturbed today to learn about the EPA's proposal to continue dumping dredged material into Long Island Sound instead of phasing out the program, as had been agreed to way back in 2005.

Despite that earlier agreement, from what I understand, this past January the EPA changed course and is now planning to dump tens of millions of tons of additional dredged material into the Sound over the course of the next 30 years. Not only are they planning on continuing to use existing dump sites, they intend to add a new site off the coast of Niantic.

I hope and trust you will do everything in your power to head off this EPA's reversal of the earlier plan to entirely eliminate the dumping of dredged material into the Sound.

Thank you, in advance, for your efforts.

Regards,

I oppose dumping dredged material in the Long Island Sound. Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal site

As an avid fisherman, as well as a patron of our state and town beaches, the health of the sound for our marine life, as well as our children, is of the utmost importance to me. Further, rather than kicking the can down the road, let's meet some of the challenges to our environment head on. This is a great opportunity to not only protect a valuable resource, but to set an example of how to solve environmental problems in a useful way. Rather than allowing the cheapest solution to continue, let's use common sense and measures that ensure our children inherit a better planet than we have. We seem to go in the opposite direction. I hope you can reverse that trend.

Regards,

Ken Ambrosio

Davender, Phyllis
441 Coe Ave
East Haven CT

Jean Brochi
USEPA
5 Post Office Square, Suite 100
Boston, MA 02109

Dear Jean Brochi:

The EPA is currently accepting comments on their proposed rule for the designation of a dredged material disposal site in eastern Long Island Sound (81 FR 24748) and a Draft Supplemental Environmental Impact Statement for the Designation of Dredged Material Disposal Sites in Eastern Long Island Sound, Connecticut and New York (ELIS DSEIS).

Although I am neither a boater nor a fisher, I do enjoy visiting the wonderful beaches on the southern portion of my lovely state. As a resident of Connecticut, I also consume my share of the excellent food that originates in the Sound. Personally, I am not a fan of dredging, but I understand it is a necessity for maintaining navigable waterways and the various harbors in our state. However, I believe that we citizens must also be responsible stewards of our land, and as such we should try our best to do the least harm when we do dredge. Do we really need to use open water as a dumping ground for the dredged material? Perhaps it is slightly cheaper in the short-term, but we must look beyond that to the long-term consequences of our actions and the harm it does to our environment and economy. I strongly urge the EPA to seek alternative better approaches to the handling of the dredged material and not let the Long Island Sound that so many people love and depend on remain a dumping ground.

Please reconsider the EPA plan to open a new dump site at Niantic Bay and to extend the life of two existing sites in the Long Island Sound, and support safer alternative reuses of the dredged material.

Thank you for your consideration of my viewpoint on this matter. I believe it is an important issue for all citizens of Connecticut and the other states of the Sound.

Sincerely,

Docket EPA-R01-OW-2016-0239
EPA New England Office
OEP 6-1
5 Post Office Square,
Boston, MA 02109

To Whom It May Concern,

I have grown up in Norwalk and on Long Island Sound for 30 years. It is important to me that we maintain a healthy Long Island Sound for the community and for the environment. I oppose dumping dredged material in LI Sound! Please reject the extension of the CSDS and NLDS and establishment of Niantic Bay Disposal Site.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ashley', followed by a long horizontal line extending to the right.

U.S. EPA,

Health in Long Island Sound is important due to the fact that I live near it, I fish in it and we should always aiming to keep our environment as healthy as possible for the next generation.

I oppose dumping dredged materials in LI Sound! Please reject the extension of the CSDS and NLDS and the establishment of Niantic Bay Disposal Site.

Please oppose the EPA plan to open a new dump site and extend the life of two existing sites in Long Island Sound and instead support beneficial reuse of dredged material as a safer alternative to open water dumping.

Matthew Morse

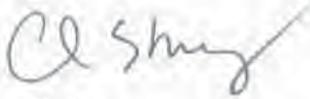

632 So. Pine Creek Road

Fairfield, CT 06824

Dear U.S. EPA

I oppose dumping dredged material in the Long Island Sound! Please reject the extensions of the Cornfield Shoals and New London Disposal Sites in Connecticut as well as the establishment of the Niantic Bay disposal site in Connecticut. Please Oppose the EPA plan to open a new dump site and oppose the life extension of two additional sites. Instead I support, and you should as well, the beneficial reuse of dredged material as a safer alternative to open water dumping.

Signed,

Chris Murray

To Whom It May Concern,

"Save the Sound" was a campaign started decades ago and residents could display their support through car registration plates. I have had one since it started, having grown up in Fairfield and spending free time as a teenager at Fairfield Beach.

I understand that you are considering dumping dredged material in Long Island Sound by extending the CSDS and NLDS. You also plan on establishing the Niantic Disposal Site.

I have been and continue to be opposed to any such action and would urge you to oppose the plan to extend the above as well as opening a new site.

I thank you for your attention on this important matter and would appreciate you contacting me to let me know how this is to be resolved.

Yours truly,

(Mrs.) Donna S. Perras

To the EPA:

I oppose the dumping of toxic waste
anywhere in the Long Island Sound.

J Phillips
4 Cherry St
Westbrook CT 06498

Dear U.S. EPA,

Long Island Sound is
infected with toxins
and no one's doing
anything about it!!

On fathers day, me and
my family spent most
of the day at the
beach. While I was
swimming in the

water, I noticed

little pieces of
plastic floating around
It's not healthy for
kids like me →

to swim in a sea of
dredged material. It's also killing
a lot of the sea
animals which is messing
up the food chain,

The sound is not a
landfill. STOP

DUMPING
DREDGED
MATERIAL

Docket EPA-R01-OW-2016-0239

Dear EPA,

Good afternoon.

This letter is in regards to dredging in the Long Island Sound, the 2005 agreement between CT and NY, and the newly released plan by the Army Corp of Engineers.

I believe that the 2005 agreement between CT and NY as signed by then governors Jodi Rell and George Pataki with the stated goal of reducing or eliminating the need for open water disposal of dredged materials in the Long Island Sound should be enacted in the spirit of the agreement. The 2005 agreement also called for the end of mid-Sound disposal sites – with the Western-most site located off of Darien which is close to my hometown of Norwalk. Instead of opening new disposal sites, the current sites should be phased out.

Even though there is a newly released, thirty year plan released by the Army Corp of Engineers earlier this year, my feeling is that the plan would take too long to implement when the environmental impact of dumping polluted material dredged from some areas such as the New Haven harbor is more immediate. The thirty year plan would allow an additional 30-50 million cubic yards to be dumped in the Sound which would prolong the December 2016 scheduled retirement of the Cornfield Shoals and New London disposal sites. The environmental costs are already being shown as there is currently an overload of Nitrogen in the sound which results in algae blooms and is lethal to fish. Contaminants around disposal sites also include elevated PCBs in fish and elevated levels of heavy metals in shellfish.

Additionally, the Long Island Sound is included in the National Estuary Program. A healthy Long Island Sound plays a major economic role, as well and is a source of recreation to 23 million residents in CT and NY. Some studies estimate the economic value of the sound to be approximately 8.9 billion dollars, annually.

Please note that as a resident of CT I am opposed to the 30-year plan and am concerned about the environmental impacts to this precious resource.

Sincerely,

Corinne Tyler
17 Wakerobin Rd
Norwalk, CT 06851

To Whom It May Concern

I'm writing to oppose dumping dredge material in Long Island Sound. Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

I've grown up on the sound and it seems it has just gotten cleaned up. I would like our leaders to work on ways to beneficially reuse the dredge material so we don't go backwards in cleaning up our environment. It would be ashamed to create another reason why people need to leave Connecticut to have a better living situation.

Thanks In Advance

June 27, 2016

I oppose the continued dumping of dredged and other material into Long Island Sound. The continued nitrogen pollution contributes to fish kills, increased algal blooms throughout Long Island Sound. Elevated levels of copper and other heavy metals have been found in Lobsters together with increased levels of PCBS in fish and other aquatic life, which can ultimately affect the health and wellbeing of all people who utilize this body of water.

Please reject the extension of the CSDS and NLDS and the establishment of a Niantic Bay Disposal Site.

Sincerely

Robert Fossett

55 Carmen Rd

Milford, Ct. 06460

Greetings EPA-

I have grown up in CT and enjoyed Long Island Sound (LIS) my entire life. Over the past decade I have been so pleased to see an increase in the number of healthy oyster beds. This is an indicator, among many others, that LIS is becoming cleaner and healthier. This has happened because you have stood up for LIS. Please do so now by **opposing open water dumping of dredged material and honor the agreement that was made in 2005 to do just this**. Please reject the extension of the CSDS and NLDS as well as the establishment of the Niantic Bay Disposal Site.

Thank you,

Sarah Gifford

OEP 6_1

5 Post Office Square

Boston, Ma. 02109

It is time to stop dumping dredged material into Long Island Sound by the EPA and put this waste into landfill sites that are safe to our environment and the people of Connecticut. Our beaches, marine life and pleasure activities along the shoreline are getting destroyed due to negligence of your agency who are suppose to work for and protect the environment. These important issues seem to bypass your priorities because the EPA, which is suppose to protect the environment, is dumping hazardous materials which will destroy the marine life in the precious Long Island Sound and once gone will probably never be restored. It is your duty to stop this from happening. As a concerned citizen I expect results.

Sincerely:

Leigh Lepper

Chris Nash & Erinn Webb

41 Earle St

Milford CT 06460

Re: Please say "NO" to the EPA's New Dump Sites in the Sound

To Those at the EPA:

As Milford, CT residents, living under 2 minutes walking distance from the Sound, we urge you to please stand with the CCE campaign against dumping sites in the Long Island Sound.

Please help prevent further PCB contamination of our native fish and heavy metal contamination of our lobsters.

Please do not allow dumping to continue for 30 years. One of us grew up here, and beach-going, fishing and swimming in the Sound was (and continues to be) an integral part of childhood in CT. We want our children, and our neighbors' children, to be able to swim in this water.

The Sound is an important part of our environment, and an important part of our lives. LIS is not a landfill. I guarantee you the majority of your constituency agrees.

We hope you will stand with us and the CCE in this endeavor as well.

Thank you very much,

Chris Nash & Erinn Webb

June 27, 2016

To The EPA

I oppose dumping dredged material in Long Island Sound. Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

We have been boating on Long Island Sound for many years and would like it to improve and fishing to get back to where it once was!

RE: EPA Docket EPA-R01-OW-2016-2039

Dear Senator:

I continue to be disappointed and more and more disillusioned by the choices made by the government of this beautiful state in the continued degradation of our land, water and air. Again, we see another atrocity on the horizon as we give permission to knowingly and without conscience dump openly into Long Island Sound. It is inexcusable.

I officially oppose the dumping of dredging material in Long Island Sound and ask you to reject the extension of the CSDS and NLDS and the establishment of a Niantic Bay Disposal site. I also am in opposition to the EPA's plan to open a dump site and extend the life of the two already existing sites in Long Island Sound. Instead, I would support the beneficial reuse of dredged materials as the safer alternative to open water dumping.

Common sense tells you this dumping is to the harm and detriment of all that natural inhabitants and birds in Long Island Sound. To recognize the problem and to continue when there are alternatives is irresponsible and despicable on the part of the officials permitting this to happen. What price do we put on the lives of animals, birds and fish who haven't the ability to speak for themselves? Would you want this dumped in your neighborhood, your backyard? Please do the right thing and not allow this to happen to Long Island Sound. Make the people

of Connecticut proud of their representatives by honoring the original phase out. Certainly to allow this happen would not be honorable on your part.

With hopes you will do the right thing, I am.....

Tuesday, June 28, 2016

Dear EPA,

I am writing to inform you of my position to oppose dumping dredged material in the Long Island Sound. Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Sight. I hope you will take initiative in protecting our sound. We the people of New York and Connecticut take pride in the wildlife and beauty our sound has to offer. There is a reason why they call this place "the sound." The water is still enough for birds to gently float on the surface and is healthy enough for fish and other wildlife to thrive. The Long Island Sound wouldn't be complete without its little creatures just like we wouldn't be complete without the Sounds safe shores. Long Island Sound is NOT a landfill, please keep our harbors safe.

Sincerely,

June 28, 2016

To Whom It May Concern:

I'm writing this note to protest the dumping of dredged waste products into Long Island Sound.

Please do what you can to help stop this proposed action and determine an alternate disposal of the dredged waste. I understand it would be possible to transport the waste inland to an underground landfill area (or several such areas) and even reuse the waste for highway construction and other such uses.

Thank you for supporting the survival of the Long Island Sound!

Sincerely,

A handwritten signature in black ink, appearing to read "William D. Hall", with a long horizontal flourish extending to the right.

The health of the Long Island Sound is extremely important to my family and me. We live next to it, boat in it, fish in it, bathe in it, take vacations next to it, walk its shorelines year round, and we eat from it...its wonderful bounty of fish, crustaceans, and shellfish. Long Island Sound is a blessing to the people who live next to it, use it and appreciate its beauty.

Do not harm and contaminate the LIS by dumping dredged waste into it!

I oppose and reject the extension of the CSDS and NLDS and the establishment of a Niantic Bay Disposal Site.

Sincerely,

BOSTON MA, 02109

I am writing today to express my opposition to dumping of dredged material into the Long Island Sound. Since dredged material can be reused in various ways, it is unnecessary to extend the CSDS and NLDS or to open a new site at Niantic Bay. Please reject these plans.

This is not a small local issue. The Long Island Sound is an estuary of significant importance. The USEPA should reconsider using the Long Island Sound as a toxic dumping ground and revisit beneficial reuse alternatives.

Thank you for the courtesy of a written reply to my letter. I do not have E-mail.

Boston, MA 02109

Dear U.S. EPA Officials:

I vehemently oppose dumping dredged material in the Long Island Sound. Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

I understand that the EPA analyzed four sites to be utilized as long-term dumpsites for dredged material in the Long Island Sound. The first two sites, considered in 2004 by the EPA and the USACE, were the Western Long Island Sound Disposal Site(WLDS) and the Central Long Island Sound Disposal Site (CLDS).

I am gravely concerned after learning the following facts:

*The WLDS site was located only 2.7 miles from the shoreline and has already received 1.9 million cubic yards of dredged material.

*It was once a prime lobster producing area, but lobster populations have declined significantly over the last decade. *The CLDS is between New Haven, CT and Riverhead, NY and has already received close to 14 million cubic yards of dredged material.

*Higher levels of toxic waste and problems with low dissolved oxygen (hypoxia) are found in and near these sites.

I sincerely urge you to reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

Thank you much for your consideration to protect our LI Sound, for ourselves, for our children, and for our grandchildren and future generations to come.

Sincerely,

July 5, 2016

To Whom It May Concern:

It has come to my attention that the EPA is currently accepting public comments about the proposal to extend the life of 2 disposal sites and to open an additional dump site in the Long Island Sound.

My family moved here from New York City last summer and since then we have very much enjoyed all the things that Connecticut has to offer. One of the best things about Westport is the beach at Compo on the Long Island Sound. I strongly oppose dumping dredged material into the LI Sound. Please reject the extension of the CSDS and NLDS and establishment of of a Niantic Bay disposal site. I have seen many vanity license plates here that say "Protect the Sound," and it shouldn't just be a slogan on a license, it should be public policy. I have three kids under 11 and I don't want anything dumped into the sound. My oldest is a Boy Scout and he knows that the campsite rule is to leave things better than you found them, and to take only pictures and leave only footprints. Dumping anything into the Sound is a terrible idea. I feel strongly enough about this to write you this letter with the hope that my comment, along with the comments of many other people in this state, will let you know how your constituents feel about the subject.

Sincerely,

TO: Honoraries Chris Murphy, John Larson, Rosa DeLauro, Elizabeth Esty, Richard Blumenthal, Joe Courtney, Jim Himes and U.S. EPA

July 6, 2016

Dear EPA, US Senators and US House of Representatives:

I'm writing because I'm very concerned about the dumping of dredged material in LI Sound. Adding another disposal site in Niantic Bay and extending the life of two existing sites is harming our environment. First of all, I'm concerned about the aquatic life that can be harmed. Lobster and shellfish populations have been effected. It's a sensitive ecosystem that is vulnerable to toxins in the water. We've spent millions of tax payer dollars restoring and maintaining a clean sound and it's counterproductive to be dumping waste back into it especially when we could be recycling the sediment and waste. I hope consider rejecting the plan proposed to the EPA to keep our sound clean.

Boston, MA 02109

To Whom it May Concern,

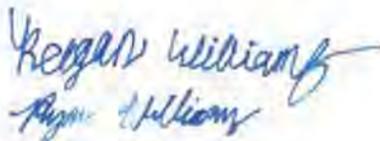

I have been fortunate to have grown up along the Long Island sound. To add to that fortune, I have been able to raise my children along the Long Island sound. In addition to teaching them the beauty of living along the water, I have taught them that there is a certain responsibility to this lifestyle- one such responsibility is that of being environmentally conscious of their surroundings.

They have grown up recycling properly, not being wasteful with water, handling garbage properly, respect of nature . . . just to name a few. As they have gotten older, our conversations have grown from plastics and glass to fracking and dredging.

We recently had a visitor to our home from Citizens Campaign and he really educated my children on the dangers of dredging. Should we be dredging the sound? Possibly. But should we be reusing this waste from the dredging of the sound? Only if it is used in a safe manner for our environment.

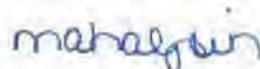

I oppose dumping dredged material in LI Sound! Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

It would be interesting to hear your take on this particular environmental issue. Please feel free to use my personal home address above to respond with your opinion, and possibly proposal, to this potential problem here in CT.

EPA New England Office OEP 6-1

5 Post Office Square Boston MA 02109

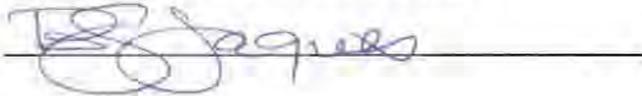

RE: DREDGED DUMPING MATERIALS IN LONG ISLAND SOUND

I am writing this note to you to express my concerns that even the EPA that I have supported for over 20-years could even see fit to dump unsafe materials in sites where they could possibly be contact with our fragile aquatic life in the sound and in turn to us the custodians of the Earth. I understand the need to dredge. I am a long time boater and fisher of these great waters and pass on this great gift to my children, but to simply just dump at the noted sites without even given time and resources to clean the materials is unthinkable. Who is really even considering such a thing? I reject the extension of the CSDS and the NLDS and the establishment of a Niantic Bay Disposal Site. To think real grown-ups hold in their hands such a crucial and quite possibly an action that may not be undoable. Please consider the future of our great sound waters and those who enjoy the pleasure of its existence.

Sincerely hoping you as representatives of us the people will here our voices.

c/o Jean Brochi

500 Post Office Square,

Ste. 100

Boston, MA 02109

I oppose dumping dredged material in the sound. It is supposed to be a resource and not a waste product and dumping of dredged material in Long Island Sound was going to be phased out according to an agreement between Connecticut and New York over a decade ago. Dumping dredged material in Long Island Sound is an easy fix, no better than sweeping dirt under a rug, it only reverses the hard work that has been done to clean up the sound.

Because of the inevitable property buildup on the lands surrounding Long Island Sound there is too much untreated runoff going into the sound and dumping more nitrogen into the sound will not improve the situation.

I oppose the extension of the existing dump sites, CSDS and NLDS, and the establishment of the new Niantic Bay Disposal Site.

Please respond in writing about your position in this matter.

Boston, MA 02109

I oppose dumping dredged material in the LI Sound! Please reject the extension of the CSDA and NLDS and establishment of Niantic Bay Disposal Site.

A healthy Long Island Sound is important to me! Pollution causes a host of environmental concerns such as: contributing to harmful nitrogen pollutants which contributes to fish kills and algal blooms, elevated levels of PCBs in fish and elevated levels of metals in lobsters.

<http://longislandsoundstudy.net/about/our-mission/management-plan/toxic-substances/> states:

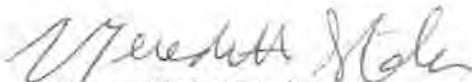

Preventing toxic substances from entering the Sound by continuing successful regulatory and pollution prevention programs is the most effective method of preventing future degradation and, in many instances, may be the most economical means of managing toxic substances.

Reducing toxic substance loads and remediating sediments will be beneficial not only to organisms that live on or in the sediments, but also to organisms that feed on them.

These actions will significantly improve and expand habitat for shellfish, finfish, and other estuarine life.

Risk to seafood consumers will be further reduced.

An improved toxic substance monitoring base will allow faster response to emerging problems and a greater ability to plan remediation activities.

RE: Docket: EPA-R01-OW-2016-0239

Dear Ms Brochi:

I oppose dumping dredged material in Long Island Sound!

Please reject the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

I am primarily concerned about the health of Long Island Sound and because of this I believe that we should preserve this resource now and for future generations. This resource provides many recreational as well as commercial opportunities for both Connecticut and New York citizens.

Thank you for your consideration of my viewpoint on this matter. I believe it is an important issue, and would like to see this plan reconsidered to ensure that there is no environmental impact on Long Island Sound.

Sincerely,

RE: U.S. EPA Docket: EPA-RO1-OW-2016-0339

Dear Sir/Madam:

We have lived in Old Saybrook, Connecticut for over 25 years. We feel very fortunate to live here year round near the water. People come to OS to vacation and enjoy our beaches and swimming in the sound. Old Saybrook is where the Connecticut River feeds into the Long Island Sound.

How wonderful it would be if the sound remained (and even got better) to be a place where the water was clean and clear not only for our residents and visitors, but for all the wildlife that depend on the sound for their very survival.

Please accept this letter as an official/personal representation of our **opposition** to dumping material in the Long Island Sound! We **reject** the extension of the CSDS and NLDS and establishment of a Niantic Bay Disposal Site.

Thank you.

Sincerely,

Neil Beezer

Please do NOT allow the dumping in the long island sound. There seems to be enough pollution in the waters now. Lobsters have had a lot of shell rot in the past few years. It seems to be a lot less lobsters around. Waters are full of Plastic balloons from nearby celebrations, empty soda and water bottles, plastic bags and so on. I boat along the shores and collect as many as possible. You would be surprise how many things I collect. People due enough damage to the sound. I oppose dumping dredged material in LI SOUND. I want to see cleaner waters in my state.

July 8, 2016

To the office of the U.S. EPA

I am writing to express concerns about an extension of the CSCD and NLDS for dumping of dredged material into Long Island Sound and Niantic Bay. The Sound is a precious resource and its ability to clean itself is limited so this material is a threat to the health of the water body's ecosystem.

Of course, the dredging of harbors is important to the economies of our little towns along the Sound, but there is a better way to deal with the dredged material.

Thanks very much for your consideration of this matter.

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to **stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.**

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. **I urge the Environmental Protection Agency to:**

- **Retire** the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- **Reject** the proposal to establish a new disposal site at Niantic Bay
- **Phase out** open water dumping in favor of sustainable beneficial reuse alternatives

Long Island Sound is NOT a Landfill

Say "NO" to EPA's New Dump Sites in the Sound

I support Citizens Campaign for the Environment (CCE) in its efforts to stop the Environmental Protection Agency (EPA) from designating new dump sites for dredged material in Long Island Sound.

The EPA is proposing to permit two or three sites in eastern Long Island Sound for disposal of dredged materials for the next 30 years! Open water dumping of dredged material is unnecessary and harmful. I urge the Environmental Protection Agency to:

- Retire the Cornfield Shoals and New London Disposal Sites in 2016 as planned
- Reject the proposal to establish a new disposal site at Niantic Bay
- Phase out open water dumping in favor of sustainable beneficial reuse alternatives
